

CART

Cart300P Precision

Precision docking cart that can be moved between key logistic points. Uses our Precision docking system. Ideal for a fully automated environment.

FEATURES

Attaches to the top module or docking station with patented locking mechanism

Added precision when the cart is docked at the docking station.

Attachment holes in the corners for adding your customized equipment

NOTE: Several carts can be used in the same setup. Extra locking mechanisms can be purchased for docking of carts from the front and the rear. *Spring kit and weight blocks are needed for effective operation with high payload. For max. payload please contact ROEQ for guidance.
